

## Control costs and maximize revenue!

Inventory suppliers as well as travel agencies are pressured by the market to optimize agent productivity and maximize profitability.

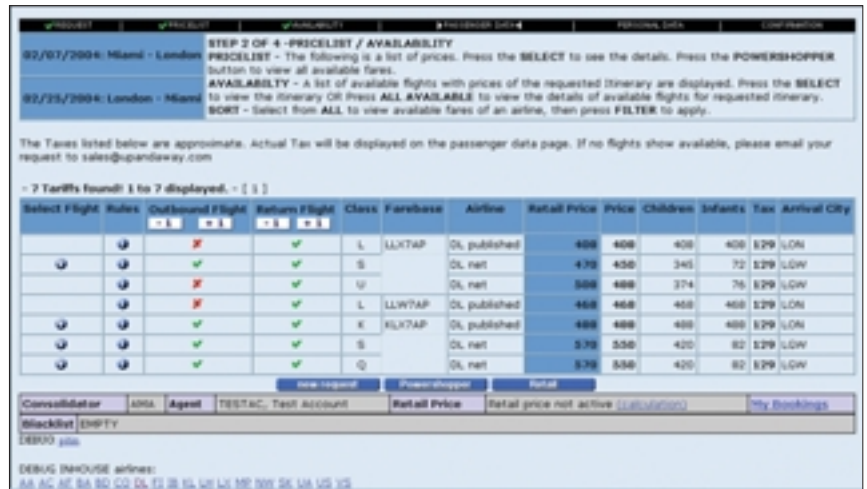

Agents need a system that can simultaneously search, analyze and book a vast array of fares inventory from different sources. Ypsilon Agentweb not only displays a comprehensive list of rule proofed applicable fares but effectively retrieves their availability within seconds, allowing agents to streamline, improve work flow and increase productivity.

Agents that access the consolidator intranet are able to see and book their contracted fares through the consolidator database and book them within seconds.

Ypsilon Agentweb handles complex restrictions that can govern a single net or commission based fare without errors and is customized to the travel agency business agreement with its consolidator

## Features

- Merges fares from different sources: Consolidator nets and negos, published fares, low cost carriers and charters.
- Single or multiple airline selection possible

STEP 2 OF 4 - PRESELECT / AVAILABILITY  
 PRESELECT - The following is a list of prices. Press the SELECT to see the details. Press the POWERSHOPPER button to view all available fares.  
 AVAILABILITY - A list of available flights with prices of the requested itinerary are displayed. Press the SELECT to view the itinerary OR Press ALL AVAILABLE to view the details of available flights for requested itinerary.  
 SORT - Select from ALL to view available fares of an airline, then press FILTER to apply.

The Taxes listed below are approximate. Actual Tax will be displayed on the passenger data page. If no flights show available, please email your request to sales@upandaway.com

- 7 Tariffs found: 1 to 7 displayed. - [ 1 ]

DEBUG INHOUSE airlines: AA AC AF BA BQ CQ DL FJ GJ HJ LJ MP NW SK UA VS YS

- Net price display can be enabled or disabled
- Net and retail price shown side by side if desired
- Automatic agency recognition
- Powersearch functionality per airline or all airlines
- “On the fly” mark-up / percent off calculation enabled

- Enhanced parallel availability retrieval
- Automated PNR placement on pre-defined PCC or office ID
- Enhanced statistics for inventory suppliers
- Optimised Scan reduction and management through permanent caching mechanisms
- Scan and booking ratio statistics per agency or branch

- Destinations statistics per carrier and global
- Statistics booking date vs departure date
- Ghost PNRs creation for low-costs carrier bookings
- Passenger profile selection and PNR merge

## Benefits:

- Supplier controlled segment.ownership with full PNR access.
- On the fly mark-up calculation.
- Increase GDS segment compensation.
- Enlarge distribution platform.
- Ability to define fare viewer ship.
- Ability to define price level individually for every single agency with selective viewership of restricted fares.
- Monitor look to book ratio of sub-agents.
- Sequential availability search that enables agents to process queries within seconds and to close more sales in less time with less efforts and no mistakes.
- Increase agent conversion ratios, optimise call handling, eliminate debit memos.
- Easy to use intuitive graphical interface requiring no training.
- Decrease average call time and communication costs.
- Increase sales and commissions.
