

## Ypsilon PNR Processor

This newly developed technology allows a call centre user to manually interface a GDS created PNR into the Ypsilon booking system.

The system reads the complete itinerary created in the GDS, and compares it to the Fareport database offering the applicable nett fares, alongside the stored, published for class booked and lowest available fare quote.

The PNR can contain only the minimum fields required to complete a booking in the GDS and upon insertion the additional fields defined by user in the admin portal will be added into the GDS to create the unique look and feel of the client, permitting integration to sales ledger interfaces and allowing post sales modules to be enabled.

The screenshot shows the Ypsilon PNR Processor web application. The browser window title is "PNR PROCESSOR - Microsoft Internet Explorer". The address bar shows "https://pp.dev.ypsilon.net/index.php". The page content includes:

- PNR Processor Header:** B2C, Conno: amauk2, Agent: suestempt, Filekey: YX58L7, and buttons for "Ignore / Start new Session" and "Logout".
- Flight Information:** A table with columns: Date, Dep.Time, Fly From, Fly To, Arr.Time, Class. Data: VS 27, 23.11.2006 Thu, 11:15, LGW, MCO, 15:40, Y.
- Passenger Information:** Reprice (STD), Pax Type (ADT), Surname, Firstname (ANOTHER, PAX), Birthdate (YYYY-MM-DD).
- Pricing Information:** A table with columns: Type, Price, [GBP], Type, Price, [GBP], Type, Price, [GBP]. It shows "Published", "Buy", and "NetNet" pricing for "Sell" and "Buy" types, all with a price of 436.00. Agency Commission is 0.00.
- Taxes:** A table with columns: Type, Tax, [GBP], Safe Surcharge, Price. Data: New: ADT: 82.00, Stored: ADT: 82.00, Safe Surcharge: 5.00 GBP.
- Manual Fare Construction:** Edit button.
- Cross Selling:** A table with columns: Type, Number, Price. Data: taxi limo: 0, 15.00 GBP; ETA VISA: 0, 20.00 GBP.
- Payment Details:** Form Of Payment (VISA), Owner Firstname, Owner Surname, Card number, CVC, Expires (01, 2006).

## Main Key Features

- Minimum GDS knowledge required
- Manual construction fields allows user to store special fares not loaded in the nett fare database such as AD75's/Staff travel contracts/RTW's
- Group bookings can be processed which cannot be booked via an online booking engine
- Queued over bookings from other office ID's can be processed
- Quick single interface to all back office systems
- Fully compatible with all Ypsilon modules; Portal, PNR Editor, Ticketing & queuing robot, sales ledger interfaces (PNR format and XML) and et@cs.
